Election/Restrictions

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

Species I, as illustrated in figures 1-8,

Species II, as illustrated in figures 9-13, and

Species III, as illustrated in figures 14-16.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, there is no generic claim.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the

examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Important Notice to Applicants

2. It is noted to Applicants that independent claim 1 recites a **non-cordless** mouse of Species I only; however, dependent claims 9 and 10 recite a **cordless** mouse of Species II or III. In other words, claims 9 and 10 recite both a non-cordless mouse and a cordless mouse. Accordingly, it is not clear that the invention of claim 9 or claim 10 is supported by Species I, II, or III.

3. It is in the best interest of the patent community that applicant, in his/her normal review and/or rewriting of **all claims**, in order:

to improve their form to conform with U.S. claim drafting practice, e.g., “its surrounding area” in line 15 of claim 1 should be changed to -- a surrounding area of said mouse --;

to make the claimed invention consistent with the specification, e.g., “an optical coordinates device output buttons or reel wheel” in lines 4-5 of claim 1 must be changed to -- an optical coordinate device, an output buttons and a reel wheel” (see Fig. 2) and “transistor” in line 2 of claim 4 should be changed to -- transformer -- (see page 6, line 23); and

to improve grammatically, e.g., “is” in line 2 of claim 4 should be deleted.

4. Further, since claim 1 does not recite a feature, “a shell shaped insulated box”, **claim 3 should be amended to depend upon claim 2 only** because there is insufficient antecedent basis for the limitation, “said insulated box” in the claim.
